

Hi Tony,

Just a little update. The speakers I got from you are really marvelous. I just have my system with new cables and I am just amazed what these speakers can do. They also look great by the way. I will send some nice pictures as soon as we get the new camera....

I now run the with SET 2a3's and silver cabling throughout. The things I use (also 45's and 300B's) are very affordable, but the sound is just stunning. Even with a Squeezebox and NOS DAC. Especially at good sound levels just amazing what it does. The bass is so good, even with 3-8 watts amps.

As you can see a very happy customer. And very happy the Klipsch LaScala's were too big. The TL-D1 are just better in almost every way.

Thanks a million
Paul Blom
